 ez-Wheel SAS with a capital of 449 332 €- RCS Angoulême: 518 704 887.

The most advanced range of electric wheels

Concentrate of technology

- ✓ integrated wheel drive
- ✓ patented technology
- ✓ award-winning

Modularity & simplicity

- ✓ the only autonomous and universal drive wheel
- ✓ multiple applications
- ✓ wide range of accessories

★★★ All-star Mobility

- ✓ prevents musculoskeletal disorders
- ✓ improves working conditions
- ✓ modernizes industrial tools

The ez-Wheel® is a simple and efficient solution to quickly bring electric assistance to any rolling equipment or vehicles.

Applied to manual equipment, it can solve major issues for employees as well as for companies:

- reduces professional risk, especially MSD*
- helps to reduce sick leave and offers an increase in productivity of up to +50%
- doubles the load for a fifth of the effort
- generates a return on investment in less than 1 year

*Musculoskeletal disorders

An innovative French company

ez-Wheel SAS is an innovative technology company founded in 2009. Based in Angoulême - in South-West France, the company develops a range of industrial electric traction solutions dedicated to handling equipment and green mobility.

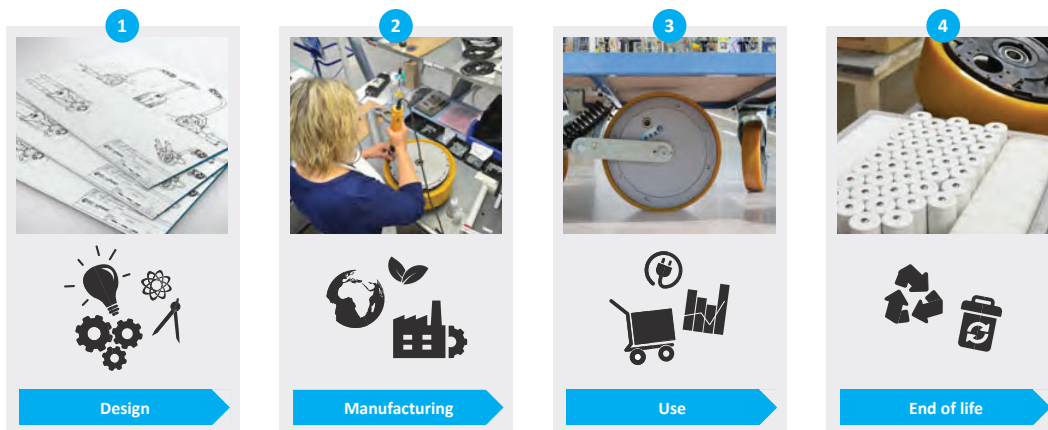

A R&D-driven strategy

The company dedicates most of its resources to Research and Development into innovating methods. The ez-Wheel team's industrial experience ensures good assessment and management of the risk related to the delivery of innovative products to market. The product's embedded features correspond to those usually required by professionals in the field and the production process uses controlled and standardized methods.

Eco-design

Our products have been developed following a life-cycle in which **production, use** and **end-of-life** conditions are taken into consideration from the **design phase**.

A lot of effort is made regarding the choice of components and the integration of mechatronics, with the intention of delivering to market reliable, powerful, sustainable and eco-friendly products, to satisfy your mobility issues.

Strong industrial partners

The production process is ensured by industrial partners selected on quality, competitiveness and local criteria, monitored by our quality/manufacturing departments and outside organizations.

Since 2012, ez-Wheel has been authorised to use the "ORIGINE FRANCE GARANTIE" quality label on its products.

Delivered by approved organisations (PRO France and Bureau Veritas) this certification is obtained by meeting precise tender specifications that validate the manufacturing origin of products in the French national territory.

Implementation promoting the mechatronics innovation

Founded and located in Charente, a strategic location for electric motors and batteries in the Nouvelle-Aquitaine region, ez-Wheel benefits from geographical and economic advantages provided by a number of industrial players and SMEs implanted locally. The innovative technology of ez-Wheel is the result of recognized expertise and local know-how going back over 50 years.

The first electric wheel integrating motor and batteries

ez-Wheel proposes the first electric wheel featuring embedded motor, batteries and electronics, bringing electrical assistance to rolling equipment. Thanks to optimal integration of the motor, batteries, and electronics inside the hub, the wheel can be fixed quickly and easily – **a safe, clean and quiet solution.**

Quick fitting

ez-Wheel® wireless technology removes all the peripherals, wire sets and connectors from the chassis, making the integration of our solutions a fast and easy task compared to other alternatives.

Designed to last

ez-Wheel® products are ready to operate in outdoor or indoor conditions, over an extended temperature range.

All the components including the battery are designed to withstand up to 7 years of operation without any maintenance required, confirmed by real returns on experience.

IP43
IP66

Protection Index

7Y.

Maintenance period in years

The solution fully integrates into a wheel all the functions of a conventional power train:

- ✓ high-end electric motor
- ✓ high energy and super long-life batteries
- ✓ power controller featuring state of the art motor control
- ✓ battery management
- ✓ wireless interface

Cover

All components of the autonomous wheel are contained in a robust and totally waterproof cover. The wheel is able to operate in the toughest environments.

Motor

The high torque and ultra-compact drive is ensured by a high-tech permanent magnet motor, and a mechanical reducer fully integrated into the wheel's architecture.

Battery

The energy embedded in the wheel is stored in a cutting-edge Ni-MH battery. Built to last, rock-solid and reliable, this technology is also one of the safest available on the market.

Electronics

The brain of the wheel is powered by two micro-controllers and two real-time operating systems. It enables wireless communication, battery management and full customization of the wheel's features.

HMI

The user interface is extremely simple. It includes the wheel's recharge connector, a diagnostic button, and lights indicating the wheel, battery level and wireless communication status.

Product features guide

Follow the guide!

Our products offer is developed for specific environments and needs. The following pictograms will help you quickly define the product's main characteristics.

Help guide Aid to comprehension		IP43 Index	Solid objects greater than 1 mm Sprays of water at any angle up to 60°
Wireless communication		IP54 Index	Limited ingress of dust Splash-proof from all directions
Serial Link communication		IP65 Index	Dust-proof Water jets
Enables regenerative charging from wheel rotation		IP66 Index	Dust-proof Powerful Water jets
Maintenance free Lifespan 3 to 7 years		IP69K Index	Dust-proof High pressure and high temperature
Designed to run quietly			Hygienic design
Up to 1 ton moved			Non-slip tyre
Heavy load moved			Shockproof
Audible warning			High-pressure jet-cleaning
Internal or External battery			Stainless-steel

INDUSTRY

Adding an electrical motorization on manual handling equipment allows improving production cycle while preserving the health of operators. Motorize any rolling equipment in industry such as heavy load carriers, industrial hand trucks or special machinery.

Endless possibilities:

Application	Heavy load carriers
Wheel	ezW300I/WR electric wheel
Accessories	ezRTH/W smart control

Application	Industrial hand trucks
Wheel	ezW150I electric wheel
Accessories	ezARH control External battery

Application	Special machinery
Wheel	ezW300I/WR electric wheel
Accessories	ezR44IN/W interface ezAAR control

They trust us:

Suitable for the Industrial sector

Up to 2 tons moved without effort!

ez-Wheel® self-propelled electric wheels are ideal for handling equipment and moving heavy loads.

◀ Up to 2 tons

Wheels can be paired to double the moved-load capacity. This platform has been fitted with 2 ezW300I/WR wheels and the load being moved is 2 tons.

◀ Continuous conveying

The transfer carriage or carousel can easily be powered to ensure repetitive motions. This example is fitted with 2 external batteries to allow for continuous use.

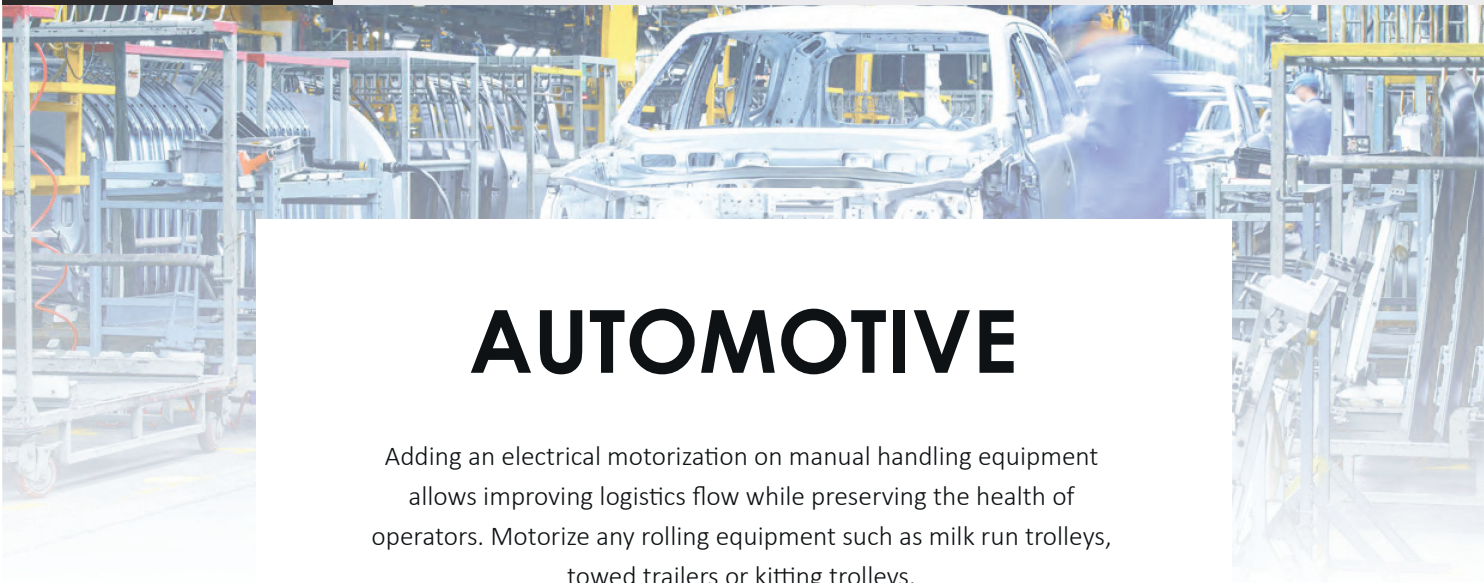

▲ Wireless control

The ezW300I/WR wheel is made for heavy load/large dimensions travel assistance. Its Wireless control offers great freedom of the manual control.

◀ Special machinery

Most industrial special machinery can be fitted with ez-Wheel® electric wheels and accessories.

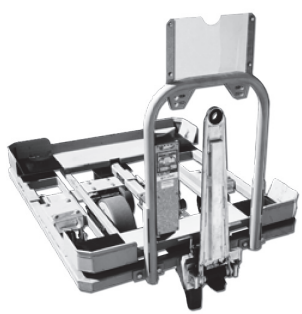

AUTOMOTIVE

Adding an electrical motorization on manual handling equipment allows improving logistics flow while preserving the health of operators. Motorize any rolling equipment such as milk run trolleys, towed trailers or kitting trolleys.

Endless possibilities:

Application	Milk run trolleys
Wheel	ezW300I/WR electric wheel
Accessories	ezMCS/H suspension bracket ezR44IN/W interface Specific button control (on request)

Application	Towed trailers
Wheel	ezW300I/CCR electric wheel
Accessories	ezMCS/H suspension bracket ezRPP/UC sensitive control

Application	Kitting trolleys
Wheel	ezW150I electric wheel
Accessories	ezMCS/160 suspension bracket ezARH control

They trust us:

Suitable for Automotive Industry

Ensuring continuous service

ez-Wheel® regenerative charging during towing feature is the perfect fit for towed material running 24/7.

◀ Regen charge while towing

ezW300I/WR and ezW300I/CCR electric wheels equipped with the « Regen » option can recharge themselves whilst being towed between the warehouse and the production line.

◀ Moving platform

Operators movements may be also assisted by electric wheel ez-Wheel®. This motorized platform is foot-controlled, allowing you to follow the overhead line movement.

▲ Sensitive control

The ezRPP/UC push-pull sensitive control resulting from collaboration with a well-known automotive group, is perfect for manoeuvring on the shop floor.

◀ Charging at workstation

ezW300I/CCR and ezW150I ez-Wheel® electric wheels, can be recharged on each back-to-workstation through recharge contacts. The built-in batteries are designed to go through many micro-charging cycles without any premature ageing risks.

FOOD PROCESSING

Adding an electrical motorization on manual handling equipment allows improving inter-units logistics while preserving the health of operators. Motorize any rolling equipment such as pusher/pullers of DIN9797 tanks, stainless steel tanks or drum trolleys.

ezW300F/W

ezRTH/W/IP

Mascot1A8/IP

Endless possibilities:

Application	Pusher/pullers
Wheel	ezW300F/W electric wheel
Accessories	ezRTH/W/IP smart control

Application	Stainless steel tanks
Wheel	ezW300F/W electric wheel
Accessories	ezRTH/W/IP smart control

Application	Drum trolleys
Wheel	ezW300F/W electric wheel
Accessories	ezRTH/W/IP smart control

They trust us:

Suitable for Food processing

Reinforced for serious tasks

ez-Wheel® sealed and waterproof products can operate in severe environments over a wide temperature range.

◀ Precise manoeuvre

The accurate motorization control allows precise positioning of machines. Here, a wine tank motorized by 2 ezW300F/W. Thanks to ez-Wheel® devices, the operator can easily position the tank above the fill access cover.

◀ High pressure jet cleaning

The highest protection index **IP69K** and the stainless-steel cover of the ezW300F/W wheel allows high pressure jet cleaning, the robustness of the assembly being reinforced by the absence of connectors and fragile units.

▲ Wireless

ezW300F/W wheel controlled by the ezRTH/W/IP tiller head offers a wireless solution without connector, perfect for demanding and wet environments.

◀ Production machinery

Even the most complex production machineries can be motorized by ez-wheel® electric wheels, thanks to its small dimensions and its standard form factor.

E-COMMERCE/RETAIL

Adding an electrical motorization on manual handling engine allows supporting the production rate increase while preserving the health of order picker. Motorize any rolling equipment such as order preparation trolleys, picking trolleys or pusher/pullers.

Endless possibilities:

Application	Order preparation trolleys
Wheel	ezW160M+ electric wheel
Accessories	ezMCS/L/160+ suspension bracket Specific control (on request) External battery

Application	Picking trolleys
Wheel	ezW160M+ electric wheel
Accessories	ezMCS/160 suspension bracket ezARH-BD control

Application	Pusher/pullers
Wheel	ezW300I/WR electric wheel
Accessories	ezRTH/W smart control

They trust us:

Suitable for e-Commerce & Retail

Flexible, time-saving solutions

ez-Wheel® solutions are ideal for picking trolleys and platform trucks designed for hundreds of starts and stops per working shift.

◀ Multiple starts and stops

The ez-Wheel® electric wheels are specifically developed to ensure thousands of successive picking trolley starts and stops, and offer acceleration and deceleration assistance, with automatic motor brake and free-wheel control.

◀ Low height

The ezW160M+ electric wheel compactness with its castor standards dimensions facilitates mechanical integration, either as original equipment or retrofitted from existing trolleys.

▲ Full integration

The ezW160M+ wheels are easily integrated to control picking systems with other electronic components, such as these trucks fitted with Put-to-Light. The wheel is able to power the other components thanks to its on-board energy.

◀ Productivity gain

Motorization increases the carrying capacity and reduces the number of trips.

Here, a trolley's puller powered by the ezW300I/WR electric wheel moving a train of 4 preparation trolleys at the same time.

MEDICAL / PHARMA

Adding an electrical motorization on manual handling equipment allows preserving the health of healthcare workers. Motorize any rolling equipment such as patient transfer, laundry trolleys, pusher/pullers, catering trolleys...

ezW300M/W

ezW160M+

ezRTH/W/IP

ezARH-BD

Endless possibilities:

Accessories	ezMCS/160 suspension bracket ezARH-BD control

Application	Pusher/pullers
Wheel	ezW300M/W electric wheel
Accessories	ezRTH/W/IP smart control

They trust us:

Suitable for Medical & Pharma

Clean, reliable and helpful

Medical

ez-Wheel® self-propelled electric wheels are ideal to preserve the health of healthcare workers.

◀ Ability to climb slopes

The motorization offers a significant crossing torque, which allows a single person to climb slopes and access ramps without wasting time and effort.

◀ Multi-purpose

Most trolleys in hospitals can be motorized by ez-Wheel® electric wheels, either by direct motorizing, or by combining them with a motorized puller.

▲ Discreet & efficient

The ezW300M/W or ezW160M+ wheels are discreetly integrated to premium medical equipment, and their silent operation is highly appreciated by users.

Pharmaceutical

ez-Wheel® pharma range is also made for clean-rooms / white rooms with the highest hygienic requirements.

◀ White and clean rooms

Thanks to its hygienic design and its special stainless-steel envelope, the ezW300M/W wheel can be used in a white and clean room.

PUBLIC SPACES

Adding an electrical motorization on rolling equipment or vehicles facilitates and optimizes every trip while preserving environment. Motorize any rolling equipment used in public spaces such as street trolleys, land drones, stage machinery.

ezW10R/W

ezW300I/WR

ezAAR

ezARH

Endless possibilities:

Application	Street trolleys
Wheel	ezW10R/W electric wheel
Accessories	ezR44IN/W interface ezAAR control

Application	Stage machinery
Wheel	ezW300I/CCR electric wheel
Accessories	ezR44IN/U interface ezAAR control

Application	Special trolleys
Wheel	ezW300I/WR electric wheel
Accessories	ezRTH/W smart control

They trust us:

Suitable for Public spaces

Even for the craziest ideas

ez-Wheel® products can be used outside on bitumen or turf, as well as uneven terrain. The ez-Wheel® range offers a solution for every mobility need.

▲ It's show-time!

The ezW300I/WR wheels can be used on spectacular parade floats, both indoors and outdoors.

◀ Manoeuvrability

These two ezW10R/W wheels driven by two ezAAR joysticks allow all complex manoeuvres and are hidden under the full costume.

◀ Ability to react

ez-Wheel® devices can motorize the most bulky equipment quickly and easily, so just a single person is required for this kind of manoeuvre.

◀ Multi-environments

The ezW300I/WR or ezW10R/W wheels can be used on maintenance and delivery equipment or even agricultural machinery.

Nominal performance	12 daN at 6 km/h
Maximum rolling speed	12 km/h
Battery capacity	240 Wh
Wheel weight	18 kg
Function ⚡	Regen

Regen feature

Enables the built-in battery to be recharged using the kinetic energy produced by the rotation of the wheel.

The wheel can be charged while rotating at a speed between 3 and 12 km/h, for instance during the towing phase of a trolley.

In this phase, the wheel switches into the charging mode automatically as soon as rotation is detected.

The wheel then presents a resisting (braking) torque and the braking energy recovered by the motor is injected back into the battery.

Regenerative charging is an exclusive function developed by ez-Wheel.

FUNCTION +

Weight

Nominal performance	250 W (S1 at 10m/h)
Maximum rolling speed	18 km/h
Battery capacity	240 Wh
Wheel weight	14,5 kg
Option	-

Weight

The robust assembly can withstand knocks and severe vibration and enables the wheel to carry some load.

14,5 kg Wheel weight

150 kg Recommended maximum load per wheel on a 10% slope

Conditions of use

The wheel can be used inside or outside, over a wide range of temperatures. The components – including the battery – do not need any inspection or maintenance over the product's whole lifespan.

-20°C
+60°C Functional temperatures range

5Y. Maintenance period in years

Applications examples

- a. Street trolley
- b. Agricultural drone
- c. Motorized parade/float character

Components specifications

Motor

Technology	BLDC PM
Gearbox	1-stage helical
Indicative lifespan	5000 h / 15000 km 1500 000 starts/stops
Nominal Speed	240 rpm (18 km/h)
Nominal power	250 W (S1 at 10 Km/h)
Peak Torque	55 Nm

Battery

Electro-chemistry	Ni-MH long life
Energy	240 Wh 24 VDC - 10 Ah
Indicative lifespan	> 5 years
Recharge mode	Charger
Minimum charging time	3 hours (to 90%)

Interface

Wired	-
Wireless	Wireless (LR WPAN) 2.4 GHz Based on IEEE 802.15.4

ez-Config® software

Configure your wheel

ez-Config® is the core of the ez-Wheel® solutions. Thanks to their open connectivity, wheels and hand controls are programmable and can be perfectly adapted to any situation.

Environment

Evaluate and understand the working place characteristics

Connection

Open ez-Config® and connect ez-Wheel® devices via a USB port

Configuration

Configure wheels and accessories
Save parameters

EN English interface

Windows compatibility
7 and above

Offline support

Available versions:

Ref. ez-Config/300

Configuration software suitable for:

- ✓ Series 300
- ✓ Series 10''
- ✓ Smart controls

Ref. ez-Config/150-160

Configuration software suitable for:

- ✓ Series 160
- ✓ Series 150

Features specifications:

This set of intuitive features have been developed and adapted thanks to years of return on experience and meet every user's demands.

KM/H

Speed definition

Define the speed of the wheel. Forward and Backward speed can be differentiated.

Direction change

Adjust the behaviour of the wheel during a change in the set direction. 2 modes are available: «Deceleration» and «Inversion».

Max speed mode

Set up the behaviour of the wheel when the rolling speed exceeds the maximum speed value entered in ez-Config®.

Acceleration time

Set up the acceleration time according to your needs. e.g. slow for patient moving, fast for picking trolley.

Deceleration mode

Choose the deceleration behaviour when releasing the hand control. e.g. motor brake resistance, free wheel to continue rolling.

Start time limiter

Limit the motor drive time for each start. When the hand control is released the wheel goes back to the selected deceleration mode.

Auto stand-by

Enter a value in seconds corresponding to the waiting time between the absence of activity on the hand control and switching back to stand-by.

Inputs Outputs

Configure external interfaces for the displays, buttons, external supply...

Free of charge software

ID login & Password on demand

ez-Wheel® devices

High level of compatibility

ez-Wheel® products have been developed to be integrated into many applications in various environments. Hundreds of accessories combinations are possible thanks to the high level of compatibility!

Wheels and accessories are designed to ensure a plug-and-play compatibility. ez-Wheel's catalogue features a full range of wireless controls and predefined cables, ready to use.

Wireless tiller head control

Bi-directional and ergonomic

Ensures a proper handling of equipment thanks to ergonomic shapes and well organised commands. The integrated wireless interface allows a simple and quick integration on rolling equipment.

Other functions:

The interface remotely displays the battery level of the wheel and the system status. It is powered by its own internal battery.

Ergo Ergonomic control

Wired hand controls

Wired and Bi-directional

Ref. ezAARmini

Mini joystick

This finger operated mini joystick can control the speed in both directions (forward and backward). It can be mounted at the end of a tube, or on a panel.

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezAAR

Joystick

The joystick can control the speed in both directions (forward and backward). It can be mounted on a panel and is suitable for tough environments.

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezARH

Rotating handle

The ezARH controls the speed in both directions (fwd and bck) with the thumb. The handle features an ergonomic and very rugged design.

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezARH-BD

Rotating handle with button and display

The ezARH-BD controls the speed in both directions (fwd and bck) with the thumb. The handle features an ergonomic and very rugged design. The second handle is equipped with a battery display and a start button.

Suitable for:	Cable required
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezAFB

Forward & Backward control

This simple button control is suitable for a basic forward and backward operation (non-progressive).

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezATH

Tiller head

The ezATH command is a tiller head type control. It ensures a proper handling of equipment thanks to ergonomic shapes and well organized commands. It can control the speed in both directions (forward and backward). For safety, the control includes a belly button.

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Cables compatibility

Wired switches

Standard switches

Ref. ezSONF-B

Switch On/Off Button

The ezSONF-B is a bistable toggle switch, to start and stop the system.

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM-UCB/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezSKEY-B

Switch Key Button

The ezSKEY-B is a bistable key switch, to secure the start of the system.

Suitable for:	Cable required
✓ ez-Box®	Ref. ezACxM-UCB/Box
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezSPBC-BD

Switch Push Button Colour

The ezSPBC-BD is an impulse push button featuring a status or battery level LED display.

Suitable for:	Cable required
✓ Series 150/160	Ref. ezACxM-BD/160

Ref. ezSEMRxM/160

Switch Emergency

The ezSEMRxM/160 is an emergency push button, to disconnect the motor power on Series 150/160 wheels.

Suitable for:	Cable required
✓ Series 150/160	Included

Ref. ezSERBxM/160

Switch Emergency Reverse Button

The ezSERBxM/160 is an emergency reverse button, to secure an operator trapped between the tiller head and an obstacle.

Suitable for:	Cable required
✓ Series 150/160	Included

Cables compatibility

Internal battery

For Series 150 & 160

Ref. ezB24V3AH/160

Internal batteries

Ni-MH 24 VDC - 3 Ah - Extra energy for continuous use

Suitable for:	Cable required
✓ Series 150/160	No

External batteries

For continuous use
